

Dura-Post® VP

High Performance Vertical Panel System

The Dura-Post® VP, High Performance Vertical Panel, is designed to meet the most demanding requirements for high visibility, reboundable sign systems. The Dura-Post VP has been successfully tested to withstand 10 bumper hit and wheel over impacts at 55mph. The Dura-Post VP is accepted by the Florida Department of Transportation as a High Visibility Median Separator delineation device. (Pictured Above.)

The Dura-Post VP is also ideal for vertical panel applications such as Pedestrian Crossing Systems and Hazard Panels for both permanent and highway applications. All panels incorporate the Safe-Slot™ design feature and meet the requirements of the MUTCD where applicable.

Vertical Panels are available as completed ready to use panels, panel blanks, and reflectorized panels.

Features

- Built on proven High Performance Dura-Post Technology.
- Stainless steel, locking sign panel fastening hardware.
- Safe-Slot™ Vertical Panel design for improved impact performance.
- Surface Mount, Soil Anchor, and Portable Mat models available for use almost anywhere.
- Twister base option available for applications that require quick and frequent installation and removal.
- Standard colors: Yellow, Orange, White and Black.
- Standard Heights: 36", 42" and 48"
