

RACE ROCK UTILITY SOLUTIONS

Perfect Fit. On Time. Every Time.

Utility
Solutions

Perfect Fit. On Time. Every Time.

Race Rock designs and manufactures engineered steel transmission and substation structures supported by in-house engineering, certified quality controls, and dedicated project management. These commitments define how we execute every structure:

- Structures that **fit right the first time**
- **Quality control** at every fabrication stage
- **Real-time** project visibility
- Dependable, **on-time delivery**

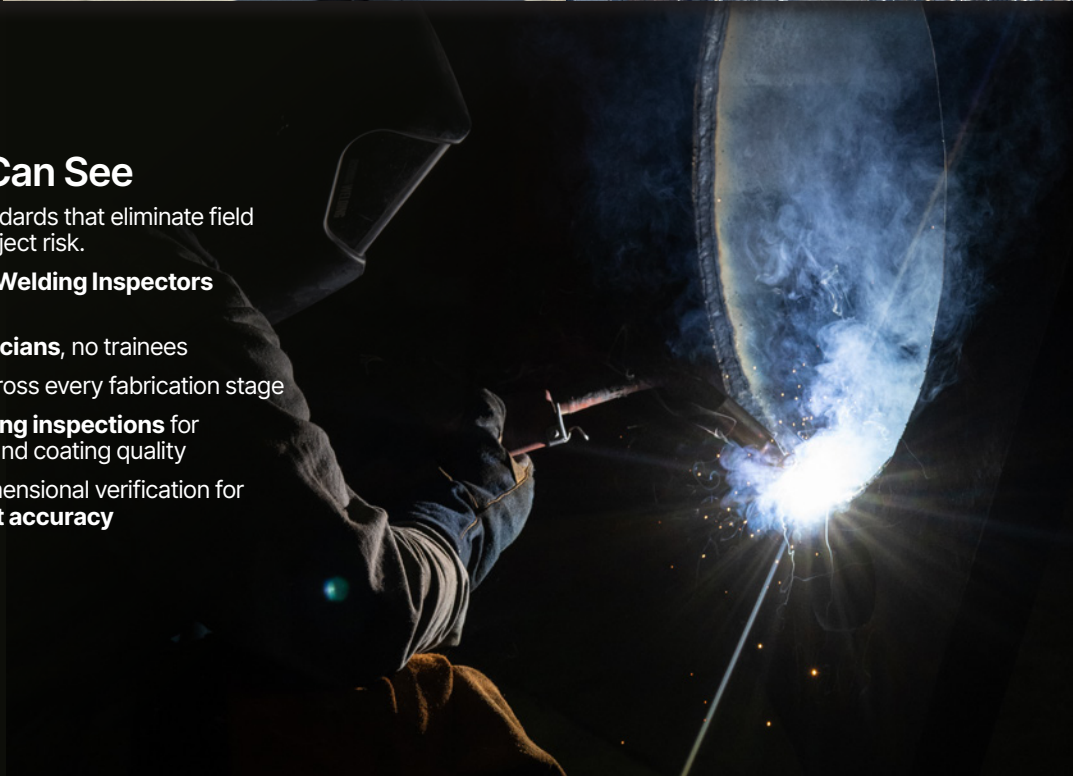

Quality You Can See

Uncompromising standards that eliminate field issues and reduce project risk.

- **Multiple Certified Welding Inspectors (CWI)** on every shift
- **Level II NDT technicians**, no trainees
- **End-to-end QC** across every fabrication stage
- **Full post-galvanizing inspections** for structural integrity and coating quality
- Comprehensive dimensional verification for **industry leading fit accuracy**

Engineering That Delivers

In-house expertise focused on safety, reliability, and long-term performance — delivering solutions, not just structures.

- **Capability up to 765kV** transmission structures
- **Tailored engineering** aligns with each project's technical, environmental, and schedule requirements
- **Real-time cross-team collaboration** across all phases
- **Systems thinking** — engineered to optimize performance across the entire line design
- **Integrated in-house design** for speed, accuracy, and quality
- Complete engineering for **transmission and substation structures**

Dependable Delivery — No Surprises

Predictable delivery, transparent communication, and a safety-driven culture that eliminates the fear of project delays, missed outage windows, or last-minute surprises.

- **Industry-leading on-time delivery rate**
- **Dedicated project manager** for every job
- **Real-time project updates** via integrated project management tools and **customer-facing status visibility**
- **4M+ hours with zero recordable incidents**
- **Fewer field corrections** due to superior engineering, fit accuracy, and inspection rigor

A Partner You Can Trust

Personal Attention. Enterprise Delivery.

Responsive, honest partnership — backed by the engineering strength, quality processes, and capacity of an industry leader.

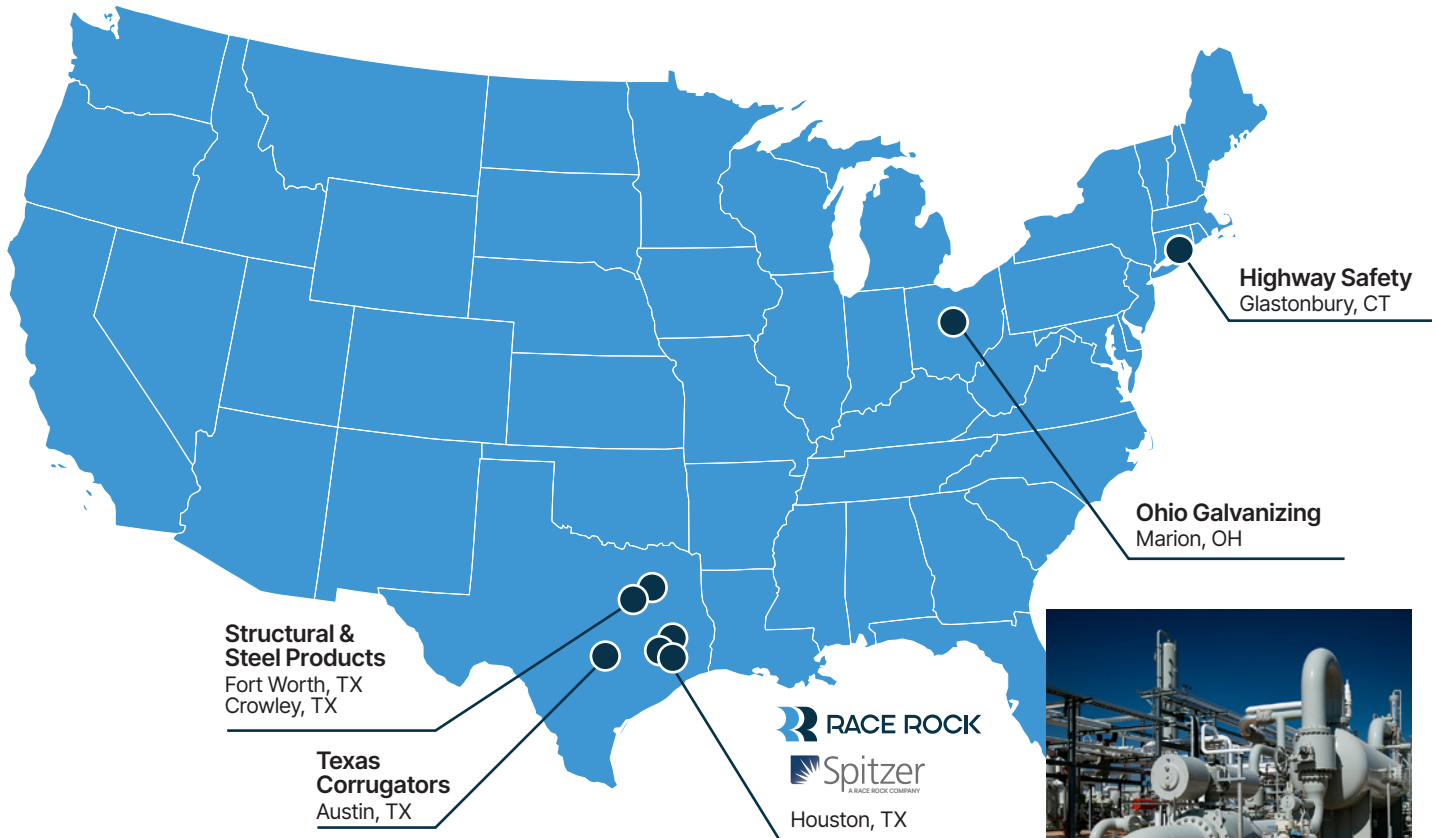

- **Attentive, responsive support** throughout the project lifecycle
- **Consistent quality and disciplined manufacturing** across every structure
- **Long-term partnerships** built through proven performance
- **Proactive communication** reduces risk and rework
- Proven track record **delivering high-voltage, technically complex projects**

RACE ROCK

Infrastructure Solutions Across Energy, Transportation, and Industrial Markets

About Race Rock

Race Rock is a privately owned infrastructure platform specializing in engineered steel solutions serving utility, highway safety, transportation, telecommunications, and industrial markets across North America.

Through its operating companies — including Structural & Steel Products, Texas Corrugators, Spitzer, Ohio Galvanizing, and Connecticut Galvanizing — Race Rock designs, fabricates, galvanizes, and delivers transmission and substation structures, highway safety systems, telecommunications poles and towers, solar support structures, and large-scale industrial fabrication and modular systems supporting energy, data center, and process infrastructure.

Spitzer expands the platform's capabilities into complex heavy fabrication, including modular process systems, structural assemblies, subsea infrastructure, and large industrial projects.

Vertical integration across engineering, fabrication, and galvanizing strengthens quality control, accelerates turnaround times, and ensures dependable delivery across critical infrastructure programs.

Race Rock's mission is to serve as **a trusted partner to those who build and maintain America's critical infrastructure.**

RACE ROCK

Multiple Facilities Supporting Utility Projects at Scale

Fort Worth Facility

180,000 ft² manufacturing

Capacity to manufacture **>30,000 tons** of steel structures annually

Designed and manufactured a 95+ ton deadend structure

Crowley Facility

>90,000 ft² manufacturing

Capacity to manufacture **>10,000 tons** of steel structures annually

Co-located with AZZ Galvanizing (58-ft kettle)

Houston Facility

287,500 ft² manufacturing

Capacity to manufacture **>40,000 tons** of steel structures annually

Heavy fabrication and lifting capacity up to 50-ton lifts

Upcoming

>200,000 ft² manufacturing

Capacity to manufacture **>40,000 tons** of steel structures annually

4,700-ton press with bending capability >1"

Certifications backed by rigorous in-house inspection and quality control
